## Ten years of helping students and the community

### 1997: two classrooms and 38 students

Nana-Fosu Randall and her husband John wanted to offer children of Ghana a chance for a good education.

### 2007: three buildings and 600+ students

We are recognized as one of the best schools in Ghana. Their well-rounded education serves our graduates well and they earn excellent marks and appreciation from others as they pursue their futures.

### Conflict Resolution

Programs about Conflict Resolution techniques are offered to students, staff and the community. These techniques are part of the life of our community.

### HIV/AIDS Awareness

Our programs educate students, staff, parents and people from our wider community about HIV and AIDS. Our Monica's Clinic offers basic medical care to the school community and others.

### Computers and the Internet

We have enjoyed access to the Internet since 1999. Our current wired network connects more than 50 recent model computers and a radio link which gives us Internet access.

### Volunteers and other Supporters

Much would not have been possible without the dedicated service of volunteers who live for a year or more at our school and help with our programs. Many others assist with their involvement, advice and donations.

### Cultural Studies

Students thoroughly enjoy their studies in dance, song, drama and other areas of traditional culture.

### Our Next Ten Years

The struggles of our start, construction and rapid growth have passed. We continue broadening the educational experiences of our students and expanding our service to the community.
